

**PROTECT
IN-CARE PERSONS FROM
NATURAL HAZARDS
AND
HUMAN CAUSED THREATS**

**REAL-TIME
COMMUNICATION**

TAP App Security is a cutting-edge hazard and threat management emergency communication system designed for schools, businesses, houses of worship, and workplaces seeking to enhance safety and reduce risk.

TAP App Security provides organizational leaders, employees, and other key stakeholders with the ability to instantly and effectively communicate during emergencies from smart phones, mobile devices, computers, and panic buttons.

TAP App Security integrates with multiple communication and security systems for optimal interoperability and incident management. The app allows direct real-time communication with emergency responders during human-caused threats and natural hazards and emergencies.

KEY FEATURES

COMPATIBILITY

Enhances emergency communications by working across multiple platforms including iOS, Android, Windows, and more.

ACCESSIBILITY

Provides decision-makers easy access to emergency procedures in the palm of their hand.

ACCOUNTABILITY

Improves in-care person accountability and reunification through unique digital features.
